In the cross-examination of Robinson Mr. Choate said:

"Did you know prior to May, 1909, what the general reputation of the Heinzes was in the general reputation of the Heinzes was in the community for honesty, truth and reliability?"

"Heinze was a man who had what hacking if he wouldn't make some statement to the Bar Association grievance commutee concerning the proceedings before him, and saying that he didn't think Robinson's conduct before the court. He evidently received a tremendous shock when he was afformed that the circumstance of being Hefuze's private counsel, as he said he was, was no reason why he should not be unterrogated about the affairs of Heinze's hank, of which he was a director. I recall istinctly the blank look of consternation with which he received the statement that he should answer or stand committed for contempt. It is my honest belief that for some time afterward he was hardly in condition to appreciate what he was doing though the subsequent transactions I know to thing, but so far as what took place before me is concerned I should consider the surrounding officures the surrounding officures the surrounding officures that in the case of Arthur points the subsequent transactions I know whether I should accept his structure.
